

## Advanced Surgery Medical Center

Cataract surgery is the most frequently performed surgical procedure in the world. In recent years, laser technology (which is used in procedures like LASIK) has been incorporated into cataract surgery to enhance the precision and accuracy of the procedure. Advanced Surgery Medical Center has become the first ophthalmology practice in the western region to offer cataract surgery with the Catalys™ Precision Laser System from OptiMedica. It is the world's most sophisticated laser cataract surgery system and enables surgeons like Dr. Pham to create a perfectly sized, shaped, and centered circular incision to access, break up and remove the cataract. This precise and accurate incision allows Dr. Pham to then place the artificial intraocular lens (IOL) in the exact intended position and provide patients a gently, highly customized procedure. Dr. Pham has performed over 300 successful surgeries at the Advanced Surgery Medical Center. With over 20 years of experience, his team consistently delivers outstanding results to their clients/patients. His award-winning, highly educated staff creates a welcoming but reassuring experience from the moment you contact his office. The Advanced Surgery Medical Center is welcoming and reassuring, providing a warm, friendly environment to help you address any of your surgery concerns. From the front desk to the doctor himself, you'll always be greeted with concern for your wellbeing.

The Advanced Surgery Medical Center also meets the rigorous, nationally recognized quality and health care service standards of the Accreditation Association for Ambulatory Health Care (AAAHC). Dr. Pham and the team at the Advanced Surgery Medical Center voluntarily participate in this quality assessment to give their patients the assurance and trust in their commitment to providing the best care possible. AAAHC's independent team of health care professionals review the team's services every 3 years to ensure you always have that extra measure of confidence in the health care services provided to you.
