Aesthetic & Refractive Surgery Medical Center MD•MS•FACS

Aesthetic & Refractive Surgery Medical Center

Aesthetic surgery using lasers can provide dramatic results for the appearance of one's face and body. Precision is the advantage laser has over cold steel and chemicals in reshaping the skin and subcutaneous tissue. Laser also stimulates collagen reorganization which helps rejuvenate the skin and provide the natural youthful look through skin tightening and resurfacing. Lasers can be used to remove wrinkles around the eyes, the lips, on the forehead, cheeks, chin, the entire face and neck. At Aesthetic and Refractive Surgery Medical Center, we offer a variety plastic and reconstructive surgery options using the latest modalities to address many of these issues.

For the past 20 years, Dr. Pham has used the most advanced techniques to provide the highest quality and safest procedures to patients from all over the world. Dr. Pham is the first ophthalmic and facial plastic surgeon to receive the prestigious Best Clinical Science Award by the American Society for Laser and Medicine and Surgery. Recognized nationally and internationally he has performed thousands of successful plastic and reconstructive surgery procedures using lasers to improve the appearances of patients and colleagues alike from all over the world. Aesthetic and Refractive Surgery Medical Center offers the following major procedures performed by the most qualified ABMS board certified plastic surgeons with over 20 years of experiences: facelift, forehead lift, cheek lift, neck lift, eyelid surgery, cheek implant, chin and nose augmentation. For over 20 years Dr. Pham and his team consistently delivered outstanding results that earned top awards from his peers. His award winning highly educated and professional staff creates a welcoming and reassuring experience from the moment you contact his office. Aesthetic and Refractive Surgery Medical Center is dedicated to providing cutting-edge technologies balanced with a warm, friendly, stress free environment to help you address all of your cosmetic concerns and issues. From the front desk to the doctors, you will always be greeted with concern for your wellbeing.

Aesthetic and Refractive Surgery Medical Center also meets the rigorous, national-recognized quality and health care service standards of the Accreditation Association for Ambulatory Health Care (AAAHC). Dr. Pham and his team at Aesthetic and Refractive Surgery Medical Center voluntarily participate in this quality assessment to give their patients the assurance and trust in their commitment to providing the best care possible. AAAHC's independent team of health care professionals surveyed Aesthetic and Refractive Surgery Medical Center services to ensure that you will always have that extra measure of confidence in the health care services provided to you. Since its establishment in 1997, Aesthetic and Refractive Surgery Medical Center has always achieved the three year accreditation awarded to the most qualified surgery centers in the US.
